GEM's quality staff has extensive experience in many facets of security, environmental engineering, program and project management, systems design, installation, and performance testing, and technology and engineering development facilitating a wide range of challenging objectives to Federal agencies, and to the commercial industry. This has included the development and implementation of national security policy, implementation of requirements, and the conduct of detailed vulnerability assessments (VA) and self assessments, audits, and inspections in the physical protection of nuclear weapons, weapon components, special nuclear materials, classified and sensitive information (Information Security), personnel security, classification and declassification of sensitive and national security information, antiterrorism, and Law Enforcement and protective force operations. We have conducted VAs of federal nuclear facilities/assets, civil aviation facilities/assets, Department of Homeland Security facilities/assets, and international and domestic petroleum reserve facilities. GEM has exceptional capability in the management of programs and projects affecting energy, the environment, and various defense-related programs. GEM's engineers also provide many years of experience in solving the difficult problems associated with the government's transition from defense-related activities to the stabilization and environmental clean-up activities. GEM currently provides expertise in all disciplines of security to the Department of Energy (DOE) and its National Nuclear Security Administration (NNSA) and VA support of the Department of Homeland Security (DHS).

Security & Emergency Management

GEM has more than 20 years of progressively responsible experience at various Federal government Agencies providing expert safeguards and security services. Our professional experts have extensive experience in all disciplines of safeguards and security and provide security support to our flagship customers. GEM provides technical support in all disciplines of S&S, including Protection Program Management, Emergency Management, Protection Program Operations, Information Security, Badging and Security Education/Awareness, Technical Security Countermeasures, Communications Security, Security Incidents, Foreign Ownership,

Influence and Control, Classification, Material Control and Accountability (MC&A), Personnel Security, Operations Security, Cyber Security, Protective Force, and Physical Security Protection Systems.

Specifically in the area of Emergency Management, GEM provides support and interfaces to ensure compliance with Emergency Response requirements at applicable HRP facilities, including conducting Emergency Preparedness (EP) drills and support access to the MSC fire services personnel. GEM support of the Emergency Management Program includes:

- Surveying and assessing hazards
- Developing Emergency Action Plans
- Preparing Building Emergency Plans
- Documenting Contingency Plan requirements
- Issuing Emergency Response Procedures
- Staffing Site Level and Facility Emergency response organizations
- Developing, conducting, and assessing emergency training and drills
- Providing emergency equipment
- Conducting assessments

Safety & Environmental Management

GEM provides exceptional support by establishing, assessing, and maintaining the proper facility and operational safety authorization basis, and the maintenance of effective integrated Safety Management Systems at most of the DOE.NNSA facilities. Our environmental engineering staff and site remediation programs have assured compliance with all regulations and provides the basis for effective clean-up of contaminated facilities/sites and the return of work areas to their original environmental state.

LABOR CATEGORIES WITH * IS APPLICABLE TO THE SCA		

“The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The Prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number identified in the matrix. The prices offered are based on the preponderance of where work is performed and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.”
